OR

x2
Screw Set C Black, Standard for 1-3/4" Door Thickness

OR

x2
Screw Set D Silver for 2 to 2-1/4" Door Thickness

Remove Existing Deadbolt

Do not discard old lock hardware until Nest x Yale Lock has been successfully installed.

2

Check Door Measurements And Make Adjustments If Needed

Door Checker

Use door checker from installation guide envelope to verify your door measurements and make any needed adjustments.

New Door Marking Template

With door checker, use template from installation guide envelope to prep a new door that has not been predrilled for hardware.

3

Download the Nest App

You must have one of the following products to use your lock with the Nest App:

- Nest Connect or
- Google Nest Alarm System

Your new Nest x Yale Lock is easy to control through the Nest App. The app will allow you to program your lock and share access. If you aren't using the Nest App, we highly recommend downloading it now.

11

Install Cover

Congratulations, you've installed the Nest x Yale Lock!

Using Your Lock

NOTE TO INSTALLER AND CONSUMER
While Yale® has included several features to prevent lockout (9-Volt battery jumper, low battery warnings), it is still possible for a lockout situation to occur. Because this product does not have a mechanical override (a key), Yale® recommends to use this product in an environment where there are additional entry points into the dwelling.

Failsafe 9 Volt
Battery Connection
(Use Alkaline battery)

There are two ways to manage and control your lock.

On the Lock:

- Touch Yale logo to wake lock.
- After waking the lock, you will be guided by the lock voice to create a Master Code using the lock keypad. Your lock automatically calibrates for use after creation of the code.
- Creating User Passcodes (25 max) and customizing settings can be done on the lock keypad after the Master Code is created.
- Lock and unlock your door by entering a Passcode on the lock keypad.

With your Nest App:

- Touch Yale logo to wake lock.
- After waking the lock, you will be guided by the lock voice to create a Master Code on the lock keypad. Your lock automatically calibrates for use after creation of the code.
- From the app, pair your lock to the Nest App.
- Creating User Passcodes (25 max) and customizing settings can be done through the Nest App after setup is complete.

Once paired, the Master Code is no longer valid. The lock keypad cannot be used to program codes or change settings.

- Lock and unlock the door by entering a Passcode on the lock keypad or remotely with the Nest App.

Nest x Yale Lock is a smart lock by ASSA ABLOY that pairs to a Google Account and uses Google services to connect to the internet. For set up and full feature access including remote control, mobile alerts, and software updates, Nest x Yale Lock requires the Nest Connect (included in box) and a working internet connection over Wi-Fi, the free Nest app, and an active Google Account. Minimum requirements are available at g.co/nest/devicereq.

Availability and performance of certain features are service-, device-, and network-dependent and may not be available in all areas. All features, functionality, and product specifications are subject to change without notice or obligation. Voice control with Google Assistant requires a compatible smart device.
